

We wish to take this opportunity of wishing you a Prosperous 2010

We would like to inform you of the latest developments, for the GPS Golf Simulator.

The latest Ball Flight enhancements, ensure that the 3D modelling of the ball flight, is without doubt the most accurate in the world. Several professionals have been truly amazed, by the realism of the in flight ball dynamics, compared to real life ball flight.

The GPS Simulator continues to be updated at an incredible pace. Having listened to our customers we are currently adding Club Fitting, so that the simulator generates income 12 months of the year. In February there will be a 3 display screen option added, so that the Simulator is a full 270 degree surround screen simulator. Other developments on the horizon, for the GPS Golf Simulator include, Digital Video and Multi Sport Simulation. All these features ensure that the Simulator, is the best revenue generator on the worldwide market.

Club Fitting

Sports Coach's Professional Golf Analysis main features are currently being incorporated into the Virtual Ranges, at no cost. Enabling Club Fitting from within the GPS Golf Simulator. The perfect solution for all Golf Retailers and Custom Club Fitters, allowing golfers to test clubs, using the world's most advanced ball flight model. The 3D High Speed Camera Simulator, easily out performs all launch monitors indoors, for both Accuracy and Reliability. Club, Ball and Swing Analysis measurements, include Ball Speed, Club Speed, Vertical Launch Angle, Horizontal Launch Angle, Back Spin, Side Spin, Swing Path and Club Face Angle.

The Club Fitting features are currently being implemented and will be released during February.

Golfers can review their performance with up to five clubs, simultaneously reviewing coloured ball flight and shot performance, for each model. The Golfers data is stored, this is utilised by any marketing software. Ensuring such information as contact names, mobile numbers and emails are saved. By using the GPS Virtual Ranges, golfers are entertained as well as custom fitted, this ensures all facilities reputation, will be further enhanced.

Flexibility

The GPS Golf Simulator is especially designed to be installed in as many types of setups as possible, whilst ensuring the extremely high levels of accuracy are maintained. The ideal setup is hitting from the centre of a 4.5m (15') wide booth, using the 3D High Speed Camera System. The Top Camera System, can be installed in only 3m (10') wide, with right hand only, or both handed setups. Settings allow the golfer to always be hitting straight to the target line. Each camera now has a tracking view of 3m (10') x 1.3m (4') resulting in the Best 3D Ball Flight, that has ever been implemented in any Golf Simulator.

Course Library

The World's Largest and best Golf Course Library, now features 100 complete golf courses and 38 golf courses under construction. During 2009 Sports Coach focused on simulating as many European Tour courses as possible. During 2010 the emphases changes to the PGA Tour, so expect many more US courses to be simulated.

The European Tour Schedule features 24 tournament courses. The golf clubs involved being Sheshan International, Hong Kong, Huntingdale, Leopards Creek, Abu Dhabi, Doha, Emirates, Saujana, Doral, Wentworth, Celtic Manor, Aa St. Omer, Munchen Eichenried, Turnberry, Barseback, Kennemer, Crans sur Sierre, Gut Larchenhof, Fontana, Old Course, Carnoustie, Kingsbarns, Vilamoura and Finca Cortesin.

Whilst during the PGA Tour Schedule features 15 tournament courses. The courses involved being Bermuda Dunes, PB Golf Links, Spyglass, Poppy Hills, PGA National, Doral, Innisbrook, Redstone International, Brown Deer Park, Turnberry, Cog Hill, Warwick Hills, Sheshan, Port Royal and Sherwood.
